TRIBUTE TO COFFEE-HOUSES

INSPIRED BY THE PAST CREATING THE FUTURE

Intellect coffee is a tribute to coffee-houses origin (Qahveh Khaneh) in the Islamic world. Coffee houses were centers of social interaction where Intellectual life occurred. People used to congregate in small groups or alone to read, talk, write or pass time.

The foundation of coffee houses took place late in the 1400s in the Islamic world, where the first coffee lovers gathered to drink coffee in Mecca and other areas of the Arabian Peninsula.

Today, more than 500 years after, younger generations continue to thrive their passion for coffee in the most complex ways.

At intellect coffee, just like our ancestors did, we provide fresh and high quality coffee, roasted in the Arabian Peninsula at our facilities in Dubai.

We add value to our customers and partners by providing an entire coffee solution among all business segments across the region. Our range of products are carefully selected to offer a unique and elevated experience.

Intellect team will help elevating the coffee experience of individuals and among the professional sector thanks to their experienced & professionalism.

We also partnered with leading coffee equipment brands to offer unique and exclusive machinery to accommodate everyone needs.

INTELLECT coffee beans are selectively hand-picked from the farms and skillfully crafted in UAE. We design our blends to achieve harmony of flavors, balanced taste and mouthfeel. All our products follow strict quality protocols and a tasting process designed by our head of coffee & world coffee champion, Q-graders and licensed coffee professionals. Experience our passion for excellence in every cup.

MEDIUM ROAST

BRAZIL

FAZENDA BANANAL, SOROCABANA

Fazenda Bananal is a large traditional family owned farm with 8 hectares of specially planted Yellow Catuai. The Farm is owned by a fourth generation farmer, Carolina Attala and her husband, with the whole family contributing to the farming, harvesting and processing functions each season. What makes this Brazilian special is the care and attention to detail the Attala's take when drying the coffee cherries, ensuring they have enough time to dry slowly. This has produced a sweet caramel note and soft melon like acidity. In the cup you can expect Caramel, Nuts and Chocolate.

MEDIUM ROAST

FINCA LA ESPERANZA

This is a limited run microlot coffee from the Finca La Esperanza, a farm situated high in the central Andes at an elevation of 1800 m.a.s.l. The high altitude slows the maturation of the coffee cherries producing an incredibly sweet and vibrant coffee. Being a caturra varietal, this is a naturally sweet and syrupy, with soft fruited notes. This particular lot was processed as a washed, adding to its vibrancy and clean cup profile.

MEDIUM ROAST

GUATEMALA

FINCA HERMOSA, ACATENANGO

Max Fernando Pérez Ríos, a third generation coffee farmer from Huehuetenango, grew up on his family's coffee farms. Coffee runs deep in his blood and this shines through the amazing coffee he produces. His meticulous attention to detail brings out nuanced flavours not often found in Guatemalan coffees. This particular micro-lot is processed as a yellow honey, giving it a smooth texture and loads of sweetness.

MEDIUM ROAST

SIDAMA WONSHO

This particular coffee is grown, harvested and processed by members of the Fero cooperative, a group of some 4,000 farmers living in the Wonsho District of the Sidama Zone. Fero farmers have worked to improve coffee quality and soil health over recent years participating in workshops led by an importing cooperative, Cooperative Coffees. Established in 1975, Fero receives excellent technical and processing support from the Sidama Coffee Farmers Cooperative Union, a secondary level cooperative of which Fero is a member. In the cup, you can expect notes of bakers chocolate, orange and a lively citric acidity.

CONCENTRATE

FLASH BREW

INDUSTRIAL · CASCARA · ETHIOPIA

INDUSTRIAL

- Intellect's Industrial Flash Brew Concentrate is made of single origin Brazilian coffee, freshly roasted in UAE.
- Extracted through advanced technology in six hours using purified cold water
- 9 out of 10 intensity
- Industrial has an intense and velvety taste with high body mouthfeel
- Industrial tastes sweet with flavors of Milk chocolate, Hazelnut, brown sugar and vanilla embodying the experience of eating a nutty chocolate bar.
- Can be diluted with hot or cold water, tonic, or milk.

DRIED COFFEE CHERRY

CONCENTRATE

INDUSTRIAL · CASCARA · ETHIOPIA

CASCARA

- Intellect's Cascara Concentrate is made of the dried pulp of Coffee Cherries from Ethiopian fresh crops.
- The cascara is infused in water and enhanced naturally to highlight the fruit's flavors
- With sustainability in mind, the pulps of the coffee cherries were kept and dried to produce Cascara.
- Cascara is a superfood and a natural antioxidant that features tangy and refreshing flavors that are similar to fresh summer breeze.
- Can be diluted with soda, sparkling or still water.

CONCENTRATE

FLASH BREW

INDUSTRIAL · CASCARA · ETHIOPIA

ETHIOPIA

- Intellect's Ethiopia Flash Brew Concentrate is made of single origin Ethiopian coffee, freshly roasted in UAE.
- Extracted through advanced technology in six hours using purified cold water.
- Intensity 7.5 out of 10
- Medium to high body mouthfeel
- Ethiopia tastes clean with rich and complex flavors like floral and fruity embodying an experience that involved taking a walk in a fragrant garden.
- Can be diluted with hot or cold water, tonic, or milk.

TRADITIONAL COFFEE MACHINES

WALLY

Automatic Milk Steamer Creating the Perfect Milk Every Time

A simple way to steam perfect milk with no training and no waste

Wally Milk, the automatic milk steamer that can be connected to all professional La Marzocco and Modbar machines, as well as most other commercial espresso machines. Wally Milk makes it easy for anyone to steam milk with no waste and minimal training, allowing the barista to focus on what really matters, which is the customer.

Wally Milk can be programmed with up to 20 recipes, making it possible to easily work with dairy and non-dairy milks and a multitude of temperatures and levels of milk aeration.

It comes with three milk pitchers (250ml/8oz, 400ml/14oz and 700ml/24oz) and, thanks to its infrared sensors automatically recognizes which pitcher is being used. It is also possible to use any matte finish pitcher, between 250ml/8oz and 700ml/24oz.

linea mini

a La Marzocco classic redesigned for the kitchen.

Inspired by the Linea Classic, the Linea Mini comes with dual boilers and an integrated brew group that allows the machine to achieve the temperature stability and energy efficiency of the saturated brew group in a reduced footprint. The Linea Mini is handmade with the same components used in our commercial machines to ensure the same durability that the Linea Classic has become famous for. With PID and a temperature adjustment wheel, the Linea Mini provides all the features necessary to make the pursuit of the perfect espresso attainable at home. Thanks to the new electronic board, the Linea Mini can now be connected to the internet and controlled through the new La Marzocco Home App, available on AppStore and GooglePlay

gs3

professional grade espresso equipment, built for the home.

The La Marzocco engineering group set out to take the most advanced La Marzocco technology and translate it for a home espresso machine. The GS3 features the thermal stability system used in the La Marzocco Strada, including a preheating system, digital PID controller, saturated groups, a dual-boiler system, and digital display. These features make for a luxury espresso preparation platform: everything you could hope for as someone who wants to enjoy the best-quality espresso at home. All that's left for you to do is to grind, dose, and tamp. Thanks to the new electronic board, the GS3 can now be connected to the internet and controlled through the new La Marzocco Home App, available on App-Store and GooglePlay.

Wide range of coffee grinding products with the best value for money, our dispensing, on-demand, bulk, domestic or built-in grinders and accessories.

High quality coffee grinders that improve and enhance the user experience – that is the everyday motivation for us at HeyCafé. Our enthusiastic team in China dedicates its work to the innovation and production of grinders for customers from Asia and around the globe. Any new inspiration and local requirement from our customers get evaluated and translated into either product updates or into an entirely new grinding solution.

Cameo

SUPER TRADITIONAL

Super Traditional machine range. The difference between the ST and the Classic range is merely the design, everything else is the same.

175 espresso performance per hour equipped with our steam wand with Everfoam, the C'2s/ST is designed to be a barista's right-hand companion.

A Super Traditional extension of our milk model machine ranges, the C'2m/ST is committed to producing 175 cappuccino per hour as well as 175 espresso per hour. Equipped with our milk system, providing hot drinks with perfectly textured milk.

Cameo

CORE *Budget friendly*

Two products at the same time

The C'2ct/Core is a stripped-down version of our Cameo/Classic. We have merely removed some nonessential parts, reduced the cost and made it more accessible for those who aspire for a Cameo but have a restricted budget. Featuring hot water coming directly from the coffee outlet and our e'Levelling brewing unit, this machine remains powerful enough to produce 175 espresso as well as 170 hot water products per hour.

The C'2s/Core has in addition to the C'2ct/Core, a steam boiler and a steam wand to enable the frothing of milk. This machine can produce 175 espresso as well as 170 hot water products per hour.

The C'2m/Core has the additional benefit of a fully integrated milk frothing system. The C'2m/Core remains committed to high productivity, and makes 175 espresso, 175 cappuccino as well as 170 hot water products per hour.
